

VISTA-Vision

Pat. Pending 17/376,936

DESIGNED
ENGINEERED
ASSEMBLED
IN THE
USA

Taking the world's leading glazed privacy glass vision panels to a new level. Based on the standard Vistamatic Vision Panels, renowned for their simplicity, durability and refined aesthetics, VISTA-Vision is sure to meet and exceed any design and privacy requirements.

VISTA-Vision, proudly made in the USA, is designed for discreet and secure observation while maintaining a stylish and contemporary appearance.

VISTA-Vision, the largest privacy panel yet, comes standard with 1/2" vertical banded lines. Narrower than the standard VISTA-Max panels, these 1/2" banded panels offer an enhanced viewing area, whilst bringing a touch of elegance to any environment.

The triple glazed system consists of three sheets of glass with evenly spaced, alternating vertical lines, which are operated using an innovative sliding magnet mechanism. When the magnet is slid, the inner sheet of glass moves side to side to enable observation and, by sliding the magnet back, vision is obscured. In the closed position the panel presents itself with a completely obscured viewing aspect, while in the open position the lines move across the screen, presenting viewing of approximately 1/2" between each one. VISTA-Vision is the first Vistamatic Vision Panel to be controlled with a magnet, instead of a lever.

NEW FEATURES

- VISTA-Vision is the first Vistamatic Vision Panel that can be used as an exterior panel.
- VISTA-Vision is the first Vistamatic Vision Panel to be controlled with a magnet, instead of a lever. One finger operation with the magnet control improves the ease of use.
- VISTA-Vision operates by moving vertical lines side to side rather than up and down.
- With a 1/2" enhanced viewing capability it brings a touch of elegance to any environment.
- Targeted for larger openings, VISTA-Vision is the largest Vistamatic panel and can fit openings up to 70" x 55"

BENEFITS

- No cutting or drilling required
- Easy to fit and install
- Fits into any frame
- Standard is only 11/16" thick
- Thinnest "blind" in the market
- Manually operated
- No special cleaning needed
- Hermetically sealed - Infection Control
- Lifetime warranty
- No external components or wires
- Virtually silent from open to close
- Aesthetically pleasing

APPLICATIONS

Healthcare

Hospitals, Nursing Stations, Patient Rooms, Operating Rooms, Emergency Rooms, ICU, NICU, Visitors Lounges, Surgery Centers, Doctor's Offices/Clinics, Nursing Homes, Extended Care Facilities and more.

High Security Environments

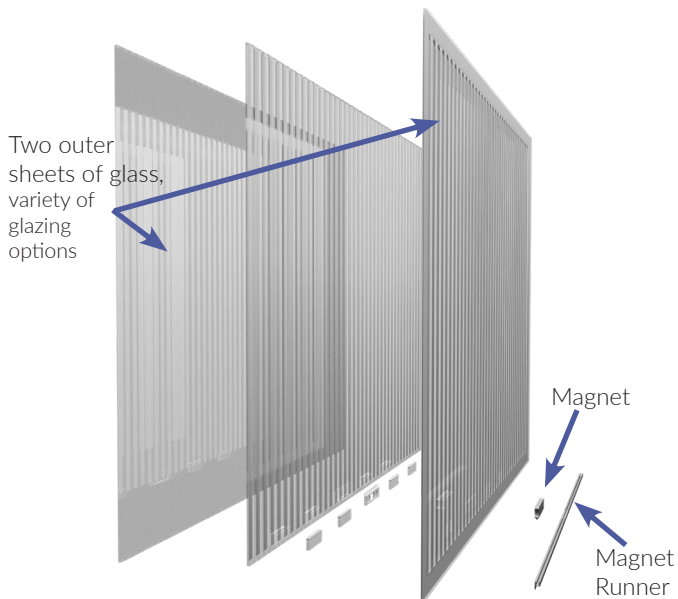

Correctional Facilities, Mental Health Institutions, Banks, Police Stations, Court Houses, Government Buildings, Municipalities and more.

Commercial

Commercial Offices, Store Fronts, Office Buildings, Conference Rooms and more.

Education

Universities, Grade Schools K-12, Child Care Facilities and more.

Construction

- Two outer sheets of 1/4" tempered glass
- 5/32" middle sheet of glass
- Total Thickness of 11/16"
- Single Seal edges with hot-melt butyl

Operation

Single or Dual-Sided

Sliding Magnet Control

Inner/Outer Panel Glass Options

Tempered	Bullet-resistant
Laminated	Laser Polymer
Lead	Impact
Fire-rated	Low E
Polycarbonate	

Middle Panel Glass Options

Tempered	for doors and other safety glazing locations
Annealed	Elsewhere

Stripe Appearance Options

Sandblasted	Digitally printed
Vinyl	Select from RAL's full color range
Vinyl	Blackout
Decorative Artwork	Logos, photos, custom
