VISION PANELS

Vistamatic Vision Panels® are the world's leading glazed privacy glass panels. Renowned for its simplicity, durability and refined aesthetics, they are fully customizable and come with a lifetime warranty.

Vistamatic Vision Panels, proudly made in the USA, are designed for discreet and secure observation while maintaining a stylish and contemporary appearance.

Each insulated unit consists of three sheets of glass with evenly spaced alternating lines, which are operated using the VISTAMATIC proprietary lever mechanism. When the lever is turned, the inner sheet of glass rises to enable observation and, by turning the handle back, vision is obscured.

Standard in every Vistamatic Vision Panel is the Impact Absorption System (IAS). The IAS, is a patent pending damper system that glides the Privacy Control Panel (middle sheet of glass) from open to close, smoothly and quietly allowing for privacy or observation.

Anti-Microbial Coatings are available for all handle options.

## BENEFITS

- No cutting or drilling required
- Easy to fit and install
- Fits into any frame
- Standard is only 11/16" thick
- Thinnest "blind" in the market
- Manually operated
- No special cleaning needed
- Hermetically sealed - Infection Control
- Lifetime warranty
- Over 300,000 turn tested
- No external components or wires
- Virtually silent from open to close
- Aesthetically pleasing

## APPLICATIONS

### Healthcare

Hospitals, Nursing Stations, Patient Rooms, Operating Rooms, Emergency Rooms, ICU, NICU, Visitors Lounges, Surgery Centers, Doctor's Offices/Clinics, Nursing Homes, Extended Care Facilities and more.

### High Security Environments

Correctional Facilities, Mental Health Institutions, Banks, Police Stations, Court Houses, Government Buildings, Municipalities and more.

### Commercial

Commercial Offices, Store Fronts, Office Buildings, Conference Rooms and more.

### Education

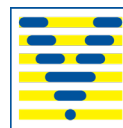

Universities, Grade Schools K-12, Child Care Facilities and more.

### VISTA-Max™

With a large viewing aspect and full-length alternating lines, the VISTA-Max is an ideal option for privacy control in doors and walls. Customized sizes are available (up to 40" x 40")

VISION PANELS

### SuperMAX™

When larger viewing areas are needed, SuperMax™ is the ideal solution. Specifically designed for large openings exceeding 40" X 40" in doors and walls, it contains two uniquely operated vision panels sealed as a single unit, with dual privacy controls. Customized sizes are available (up to 80" x 40")

### VISTA-Max™ Note

To be used with dry erase markers, the VISTA-Max NOTE adds a note taking functionality to the already versatile VISTA-Max. Great for Healthcare settings. Customized sizes are available (up to 40" x 40")

### VISTA-Slide™

The VISTA-Slide, designed for large spaces, features one continuous privacy vision panel that operates by moving vertical lines side to side rather than up and down. Customized sizes are available (up to 80" x 48")

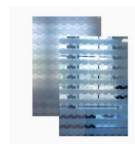

### MAX-XL™

The MAX-XL® dispenses with the need to install two individual panels vertically into a door blank. The upper area are privacy vision panels, and the bottom is stationary frosted glass. Customized sizes are available (up to 40" x 80")

### VistaART

With the VistaArt privacy vision panels, any type of custom graphic can be applied to any Vistamatic project, from soothing or colorful designs to logos and brand identity. We can create visuals that can transform the aesthetics of an environment while maintaining the privacy and observation controls needed.

### VISTAcloud

VistaCloud is a privacy vision panel with a twist. The alternating curved lines of the privacy vision panel, in lieu of straight ones, gives the feeling of floating on clouds. Customized sizes are available (up to 40" x 40")

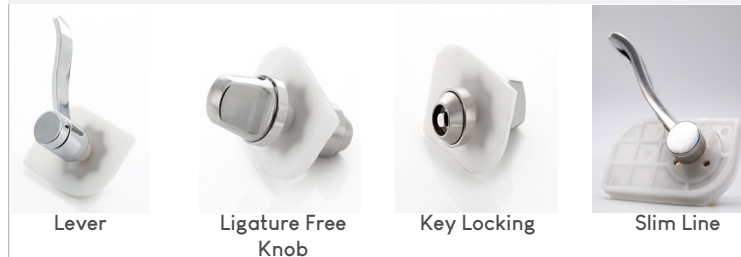

Construction
• Two outer sheets of 1/4" tempered glass
• 5/32" middle sheet of glass
• Total Thickness of 11/16"

Operation
Single-sided or Dual-sided
