betweenglassblinds™

INTEGRAL BLINDS FOR PRIVACY + OBSERVATION CONTROL

Privacy built into the glass.

Fully integrated Venetian blinds sealed between two panes of glass provide adjustable privacy without exposed cords, external blinds, or fabric treatments.

DESIGNED, ENGINEERED & ASSEMBLED IN THE USA

A CLEANER, MORE FLEXIBLE PRIVACY SOLUTION

BetweenGlassBlinds™ combines privacy, observation, and light control in a durable sealed-glass unit. Manual configurations operate with a smooth external magnetic control, while motorized units offer remote operation. Custom colors, controls, and glazing options help adapt the system to healthcare, commercial, institutional, and residential projects.

PRODUCT HIGHLIGHTS

- Tilt-only, tilt-and-lift, and motorized options
- Standard 1-1/16-inch sealed glass unit
- Custom sizes up to 75 sq. ft.*
- Multiple glass and glazing options
- Interior and exterior applications*
- Six standard blind colors*
- Designed, engineered, and assembled in the USA
- 10-year limited warranty

*Available applications, options, colors, and maximum sizes vary by configuration.

WHY BETWEENGLASSBLINDS™

Easier to maintain
Sealed blinds stay protected from dust, damage, and frequent cleaning.

Flexible privacy control
Adjust privacy, visibility, and light using manual or motorized operation.

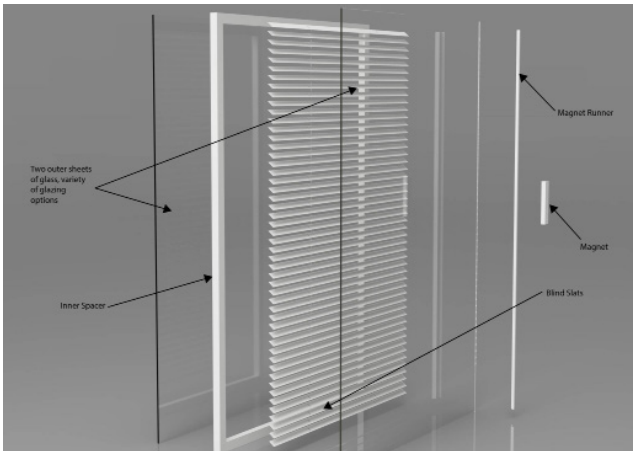

Made for demanding spaces
Supports privacy, hygiene, safety, and observation needs across demanding environments.

Built for the project
Custom sizes, controls, glass types, and glazing configurations are available to meet project-specific requirements.

COMMON APPLICATIONS

- Healthcare and behavioral health
- Commercial offices and conference rooms
- Educational facilities
- Hospitality environments
- Residential applications
- Secure and controlled-access spaces
