

HUEE

DYNAMIC GLAZING

Adaptable glass. Exceptional possibilities.

One glass unit. Four ways to control your space.

Huee Dynamic Glazing combines solar shading and privacy control in one glass system, available as interior laminated glass or an exterior insulating glass unit.

Clear

Welcome daylight and views.

Privacy

Visual privacy with diffused daylight.

SunControl

Deep tint.
Clear views.
Less glare.

Shade

Blackout on demand.

Comfort, privacy, and a cleaner design.

Light and privacy control within the glass, reducing the need for separate blinds or curtains.

A more comfortable space.

Manage glare and solar heat gain as daylight conditions change.

Greater design freedom.

Plan for views, privacy, and light control within the same glazing system.

Adapt the space to the activity.

Adapt the environment for work, meetings, presentations, or rest without changing the layout.
